

Wash Your Hands

Music: Pauliina Lerche

Lyrics: Pauliina Lerche, Simon Walker

Arrangement: Antti Halmetoja

Across the world in a far-off land
There's a market trading place
With monkeys, frogs and porcupines
And a basket full of snakes

Where people and wild animals
Mix way too close for sure
Which starts lots of viruses
Scientists fight to cure

A virus is a tiny thing
That clings to living cells
Infection spreading round and round
From folk to folk it grows

On airplanes flying in the sky
Across the globe on boats
The virus travels everywhere
It's a worry we all know, so

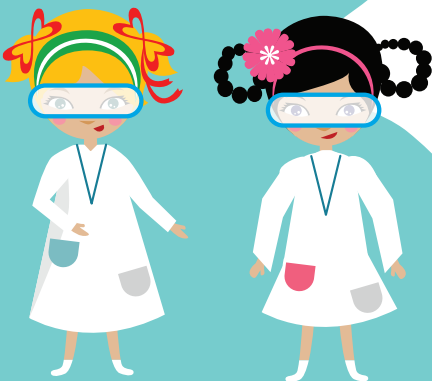

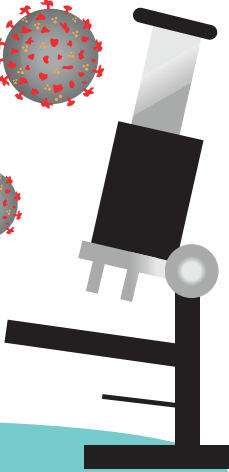

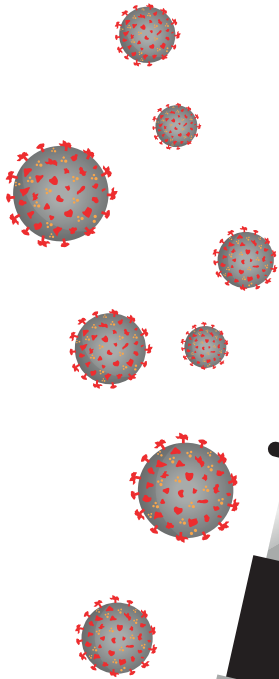

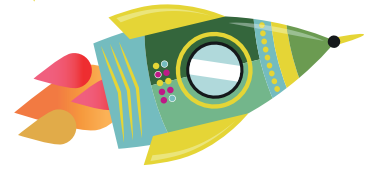

Wash your hands with a soap bar
Your fingers, thumbs and nails
Then lather up your palms
So your health will still prevail

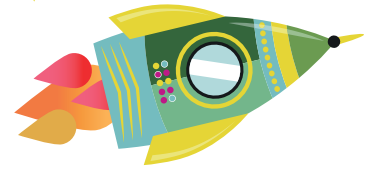

Keep scrubbing 'til they're gleaming
And leave the water on
For the time it takes to sing
The chorus of this song

Your granny and your grandpa
Are happy when you call
By taking care of older ones
They don't feel so alone

Now normal life is stranger
You can't play like before
While not in school, just read a book
There's so much to explore

And if you're feeling ill, well
Keep calm and unafraid
Remember to be safe at home
From others, stay away, so

Wash your hands with a soap bar
Your fingers, thumbs and nails
Then lather up your palms
So your health will still prevail

Keep scrubbing 'til they're gleaming
And leave the water on
For the time it takes to sing
The chorus of this song

Many have anxiety
Many all fear what may be
But we can battle through, you'll see
To beat this cruel disease

Wash your hands with a soap bar
Your fingers, thumbs and nails
Then lather up your palms
So your health will still prevail

Keep scrubbing 'til they're gleaming
And leave the water on
For the time it takes to sing
The chorus of this song
